

Hello. We're Veterinary and Poultry Supply. And we know what you're thinking.

It's about **chickens**, isn't it?

We get that a lot. It's the name. And (you guessed it) we sell poultry supplies. But hey, if you had the same name for over 60 years you'd probably be attached to it, too. So we can't change our name, but we can tell you what our name **doesn't** say.

Our name doesn't say that we carry products for all types of animals at the fair now. Not just the birds.

But we do. As an animal health and nutrition distributor, we have access to thousands of items from the brands you know and trust.

Our name doesn't say that we're still family owned and operated. And that we're just as dedicated as we were in 1957.

But we are. Give us a product to find and we're on it. We can even get Rx products through our pharmacy.

Our name doesn't say that if you stop in our store you'll see more than just livestock and horse supplies.

But you will. We've got plenty for dogs (and cats), too. Our most popular line is Durvet- a company that focuses on affordable products that work just as well as the big names.

Our favorite? It's probably a tie between **Zo-Guard Plus** - a flea and tick topical that uses the same active ingredients as FRONTLINE Plus at a fraction of the cost and **Duraflex Soft Chews** - inexpensive joint health treats that our own senior dogs have approved.

We're also pretty big fans of Animed's new **ViaCalm with Hemp.** (We can't be the only ones with dogs that are terrified of storms and fireworks, right?)

Stop in and see us.
